Project Peer Feedback

From the peer feedback, reviewers think this project is very useful for researchers to explore the conference they are interested in. Based on this purpose, reviewers believe the "keyword dictionary" is much more useful than others. We have the same opinion. However, because the keyword is difficult to extract from the paper text, we set this functionality as optional and will attempt to implement that after milestone 1. Reviewers also suggest to add words cloud for most popular keywords. Similarly, this improvement is based on keywords extraction as well.
